Life Group Discussion Questions

1. Why would God lead His people to the brink of death by dehydration and then bring them to the bitter waters of Marah?
2. Can you think of instances at work or in your past where there was some problem, but the people turned on the leader instead of really focusing on a solution to the problem? (Personal question for private reflection: Have you done that in the body of Christ, or are you doing that?)
3. What other occasions arose in the wilderness wanderings or later in Israel's history where they failed to turn to the Lord, did not heed His Word, and therefore suffered the consequences?
4. How do we know that God's purpose was not just that His people would never suffer sickness or ailments, despite what Ex. 15:26 appears to indicate that? Does this apply to us today?
5. How did God confirm His care and provision for the multitude of His people that He brought out of Egypt at the end of this episode (see v. 27)?
